

Engage Your Audience

Live Polling & Ask a Question Form

As a speaker at our event, you have two audience engagement tools at your disposal. Live Polling and Ask a Question will be available in the Event App.

If you would like to have either or both at your session, please complete the form and return to
by

Session Name

Live Polling

Live Polling allows you, the speaker, to gather audience feedback and display the results live in the session. Use it to gauge the temperature of the room, determine the consensus of the audience on a given topic, and create discussion points in your session.

YES I'd like to use Live Polling in my session.

Please Include Your Live Polling Questions and Responses Below

We recommend no more than three questions per one-hour session.
For more best practices download our [How to Use Live Polls document here!](#)

Ask a Question

Ask a Question allows attendees to submit questions through the Event App. You, the speaker, can view the questions and respond to them during the session. This can be done in the Q&A period or throughout the session.

You can also use Ask a Question to have attendees submit discussion topics, and vote for the topics they'd like to discuss, or the questions they'd like to have answered first. You can choose to display these questions or discussion topics live in your session, or on a moderator screen only you can view.

YES I'd like to use Ask a Question in my session.

Your AV tech and event staff will walk through how these features will work onsite during your sound check. Should you have any questions, please don't hesitate to get in touch.
